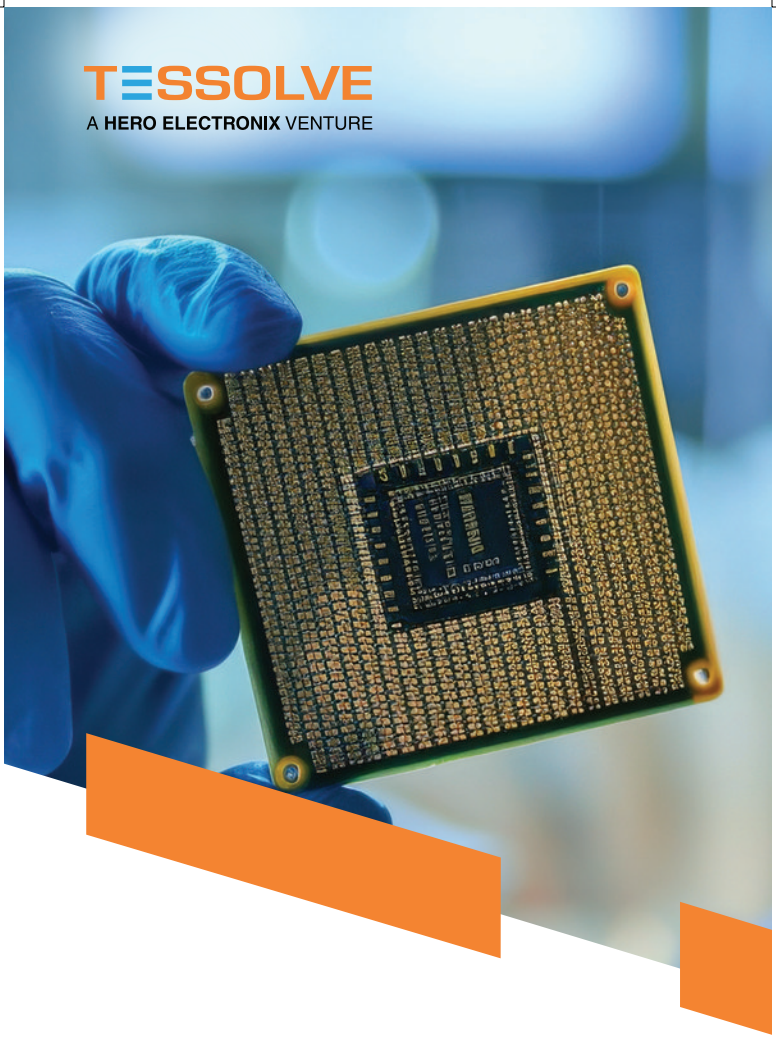
TESSOLVE

A **HERO ELECTRONIX** VENTURE



Enabling the Future of **Semiconductors & Systems**

Transforming possibilities into next-gen products

TESSOLVE
A HERO ELECTRONIX VENTURE

Who We Are

Tessolve
is a leading provider of end-to-end engineering services across the semiconductor value chain, covering chip architecture, design, test development, and embedded systems.

3800+	90%	20+
experts	technical staff	years of experience

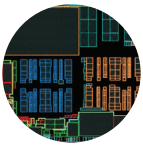
TESSOLVE
A HERO ELECTRONIX VENTURE

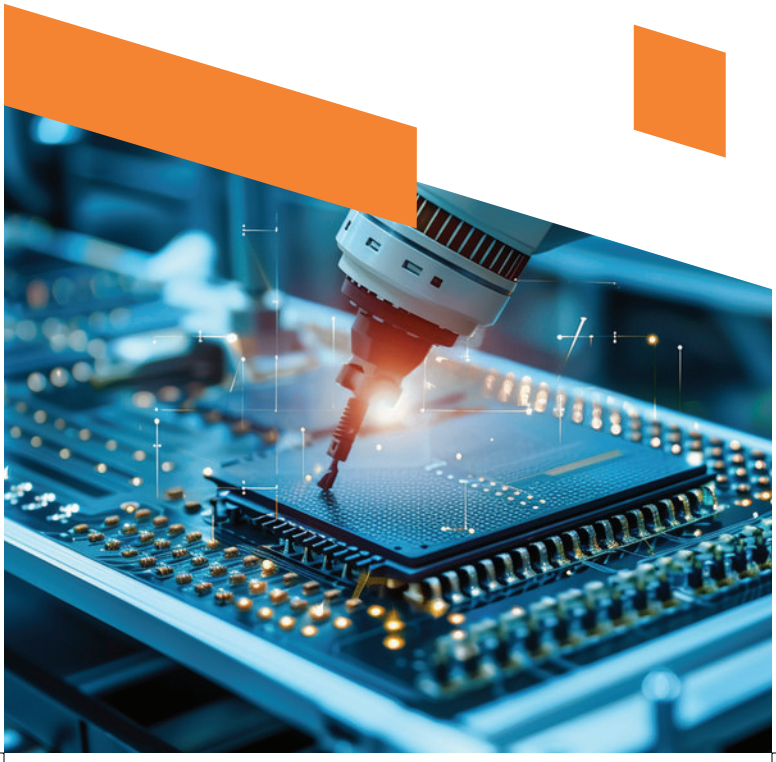
End-to-End Capabilities



IC Design

Post Silicon

Embedded



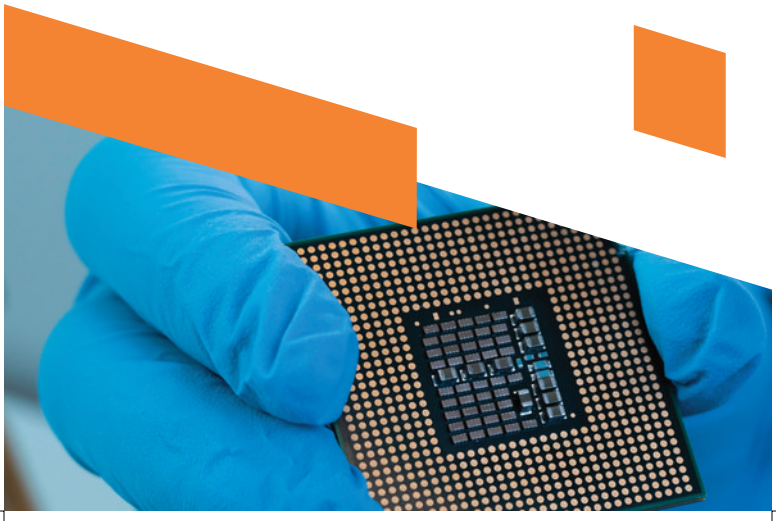
Industries We Serve

- Semiconductor
- Automotive
- Data Center & Enterprise
- Artificial Intelligence
- Industrial / IoT
- Avionics

TESSOLVE
A HERO ELECTRONIX VENTURE

IC Design

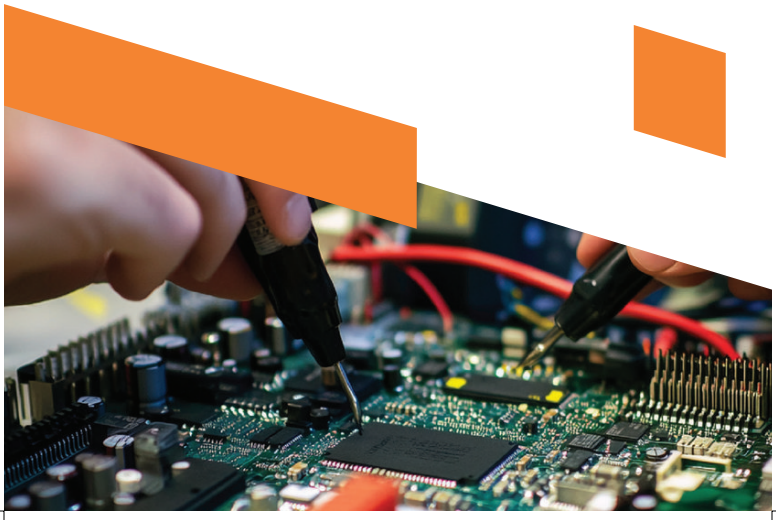
- Specs-to-GDSII solutions for Analog, Digital & Mixed-Signal designs
- Digital turnkey capabilities including architecture, RTL, verification, DFT, synthesis & STA
- Advanced process nodes from 3nm to 180nm
- Verification IP (VIP) solutions across multiple protocols



TESSOLVE
A HERO ELECTRONIX VENTURE

Post Silicon

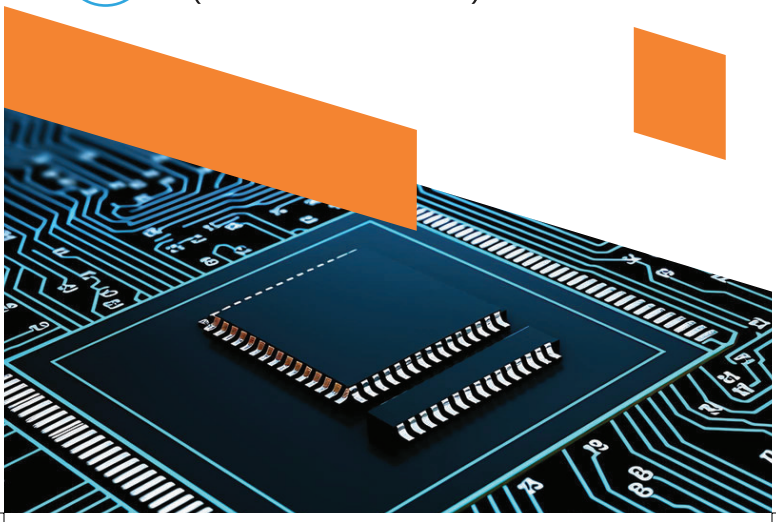
- Test strategy, development & characterization (ATE and bench)
- Seamless transition from development to production
- PCB design from schematic to manufacturing
- Reliability services including HTOL, ESD, latch-up, burn-in & failure analysis



TESSOLVE
A HERO ELECTRONIX VENTURE

Embedded

- Embedded product design for Hi-tech, Mobility & Industrial sectors
- Linux, Android, firmware, middleware & driver development
- AUTOSAR & ISO 26262 compliant development
- Functional safety & cybersecurity
- Reference platforms: TERA (Edge AI), Rutomatrix (Remote Automation)



TESSOLVE
A HERO ELECTRONIX VENTURE

Our Partners

GlobalFoundries
tsmc
ADVANTEST
Texas Instruments
cadence
SIEMENS
NXP
TERADYNE
Qualcomm
MEDIATEK
RENESAS
SGeT
Infineon
NATIONAL INSTRUMENT

Global Presence

India | USA | UK | Germany | Singapore | Japan | Taiwan | Malaysia | Thailand | Canada | Netherlands | Philippines
